AI competitor report: Capgemini

Generated 12 Nov 2026 (today) · what each competitor did in AI in Q3 2026 and so far in Q4 2026 (to date), and an outlook for Q4 2026. Sources and method at the end.

Summary (analysis)

> *Written by the local model (gpt-oss-20b) from the facts in this report; every sentence cites its sources and was checked by code for citations and numbers.*
>
> Capgemini is advancing agentic AI in retail, showcased at Google Cloud Next 2026 with Mark Steel. ● **medium** [6] Capgemini is developing generative media solutions, highlighted at Google Cloud Next 2026 with Khulan Davajav. ● **medium** [5] Capgemini promotes human-AI collaboration in insurance, as per its blog on smarter insurance. ● **medium** [7] Capgemini is researching AI economics, as per its research snapshot. ● **medium** [9] Capgemini emphasizes vibecoding technology, as shown in People Behind Innovation videos. ● **high** [4][8]

How to use this report

Start with the scorecard to see who is most active in AI and whose activity is rising. Each company section then lists what it actually did in Q3 2026 (dated headlines you can open through the [n] source numbers at the end), followed by an outlook. Treat the analysis paragraphs as a starting point: they are only as good as the headlines they cite, so open the sources before relying on a claim.

Key findings

- **5 of 10 competitors** reached medium or high confidence (live search found too few; low-confidence names are listed at the end, or name them yourself with `--competitors`).
- **Most AI news in Q3 2026**: IBM (42 AI items).
- **AI's share of headlines is rising** (Q4 2026 (to date) vs Q3 2026): Capgemini.
- **AI's share of headlines is falling** (Q4 2026 (to date) vs Q3 2026): Accenture, Deloitte, Wipro.

Scorecard

#	Company	Competes in	Confidence	AI items Q3 2026	Q4 2026 (to date)	AI share of headlines
-	Capgemini	(the company)	-	42	49	▲ **up** 48%, was 40% (● **medium**)
1	Accenture	direct rival	● **high**	26	38	▼ **down** 27%, was 40% (● **medium**)
2	IBM	direct rival	● **high**	42	52	► **flat** 29%, was 30% (● **medium**)
3	Deloitte	direct rival	● **high**	31	18	▼ **down** 14%, was 36% (● **medium**)
4	Tata Consultancy Services	direct rival	● **high**	35	39	► **flat** 28%, was 27% (● **medium**)
5	Wipro	direct rival	● **high**	22	14	▼ **down** 13%, was 27% (● **medium**)

Capgemini vs its competitors (analysis)

Capgemini's vibecoding focus contrasts with competitors' emphasis on AI agents, as seen in IBM's Imagine Enterprise and Deloitte's M&A platform for AI capabilities. ● **medium** [4][8][32][41]

Caveats

Only 5 of the 10 requested competitors were confirmed by two or more independent sites, so the comparison is narrower than it looks. The trend compares AI's share of each company's headlines in the quarter so far with Q3 2026. It counts headlines, not deals or revenue, so a quarter with a lot of other news (a big contract, a lawsuit) lowers the AI share without any less AI work. It is not a forecast. Google News is dominated by press releases and finance sites, and company blogs and YouTube feeds only return their latest posts. The analysis paragraphs come from a local language model. Code checked that each sentence cites real sources and uses no number missing from them (6 sentences failed and were removed) and that names it mentions appear in those sources, but not that the reading is right: a word like 'agentic' can still be the model's own gloss. High confidence needs two or more sources; predictions are capped at medium.

Capgemini (the company)

- **AI items / all items collected**: Q2 2026 45/103 · Q3 2026 42/105 · Q4 2026 (to date) 49/103

What this means (analysis)

Wipro is transforming healthcare member experience with its ACA.AI solution for HealthPlan Services. ● **medium** [63] Wipro’s AI push has freed capacity equivalent to 20,000 workers, according to its CTO. ● **medium** [61] Wipro partnered with Labelbox to scale adoption of AI agents that learn from enterprise experience. ● **high** [65][66]

Outlook for Q4 2026

Wipro is expected to launch a new AI agent platform for enterprise use, building on its partnership with Labelbox. ● **medium** [65][66] Wipro may further scale AI agents across industries, as indicated by its recent mobilization of a new model army for AI. ● **medium** [58]

- **Activity (rule)**: ▼ **down**: AI is 13% of its headlines so far this quarter (14 of 105), 27% in Q3 2026 (22 of 82) · confidence ● **medium**
- **Likely focus (rule)**: newer: ai agents, agentic (this quarter only)

Sources and method

How to read this

- **AI item**: a headline/post whose title matches the AI keyword list (word boundary; the entity's own name is removed first, so 'Mistral AI' alone is not AI). Ambiguous terms (Gemini, Claude, Llama, Grok, Copilot, inference) count only next to another AI term or in model context ('Google Gemini', 'Claude 4').
- **Item confidence**: high = first-party (own blog, Medium, YouTube); medium = a news headline naming the company, or a Hacker News post linking to the company's own site; low = other Hacker News posts, which are often about the company rather than by it.
- **Competitor confidence**: distinct web domains naming it as a competitor (3+ high, 2 medium). A name that Wikidata does not list as a company, brand or product stays low; a different Wikidata class from the category's drops one level. A product is listed under the company that makes it ('via ChatGPT'); products with the same owner are merged.
- **Outlook for Q4 2026**: AI's share of the company's headlines so far this quarter vs its share in Q3 2026 (more than 20% change = up/down). A share, not a count per day, because news search returns more recent headlines than old ones, which made a per-day count rise for nearly every company. Only sources with full history are counted (blog/Medium feeds and YouTube RSS return just the latest posts). A stated rule, **not a forecast**.
- **Links** were fetched live at 12 Nov 2026, 13:40 UTC (today): live, unverified (bot wall, rate limit, timeout or server error) or dead (404/410/no connection, removed from this report).
- **Vision notes**: a local vision model reads a screenshot of each homepage and lists the AI products visible on it. Model output, **unverified**: check against the screenshot; never used in any count, confidence or outlook.
- **Analysis paragraphs** (marked 'analysis'): written by the local model gpt-oss-20b from this report's own headlines and counts. Code drops any sentence without a valid [n] citation, without a confidence, or with a number not in its facts. Never used in any count, confidence or rule-based outlook.
- **Likely focus**: AI terms in Q3 2026 and Q4 2026 (to date) headlines; terms in both quarters are 'continuing', terms only in the current one are 'newer'. A rule over headline words, not a forecast.
- **[n]** numbers point to the numbered source list below.
